Talk Handsfree

Great sound reproduction, without having to hold the phone to your ear – so you can talk completely handsfree. A true plug & play device with a user-friendly menu and an inbuilt answering machine, a great chat has never been easier.

Nice and simple

- Freestanding handset with a speaker for easy handsfree calls
- Up to 60 min. message on your answering machine
- Textured back cover for non-slip grip
- 4.1cm (1.6") graphical display with blue backlight
- Menu in multiple local languages
- Up to 16 hours talk time on a single charge
- Programmable hot keys for quick dial
- Caller ID – so you always know who is calling

Crystal clear sound

- Parametric Equalizer delivers pure and clear sound
- Optimized antenna layout for great reception in any room
- Advanced sound testing & tuning for superb voice quality

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

PHILIPS

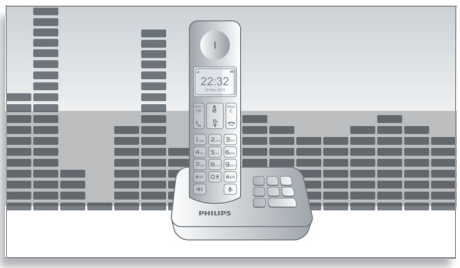
sense and simplicity

Highlights

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and handsfree modes.

Parametric Equalizer



Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

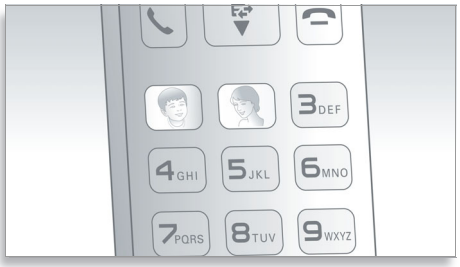
Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Menu in local languages

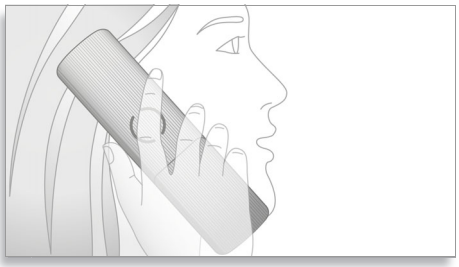
Enjoy easy set-up, navigation and control with intuitive menu available in up to seven local languages.

Programmable hot keys



Now calling the people you care about most is easier than ever. With simple one-touch dialing, you will never have to search for their number again. You can program up to 2 keys for instant calling.

Non-slip grip



The rear of the handset is treated with a special texture for added comfort and better grip.

Eco-conscious model with ECO+

Philips phones are energy efficient and designed to be respectful to the environment. The power consumed by them in stand-by mode is less than 0.75 W. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. Whith ECO+ mode activation the radiation drops to zero.

Up to 16 hours talk time

Up to 16 hours talk time on a single charge
